

Now, if you had to pick one country from around the world that you personally considered to be Canada's closest friend and ally, which country would it be?

There are many different areas of interest for the bilateral relationship between Canada and the United States. Each country usually has their own needs or wants, but let's assume a group of political, government, and business leaders/stakeholders were to meet at a summit to prioritize some of the things they should be addressing together. Now, if you could be in that room, how much of a priority would you tell them to put on each of the following items to be working on together?

Invest in/build waterways, road networks, and railroads to improve supply routes
